FARM ANIMALS

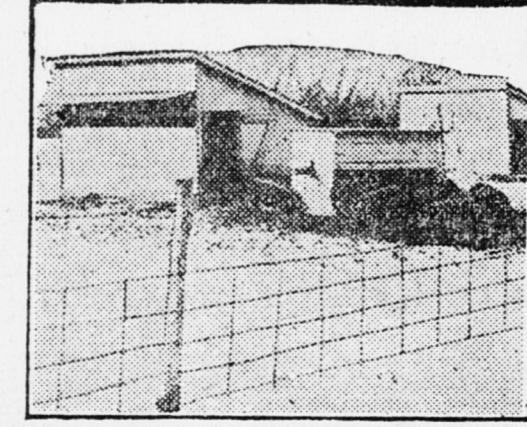

GIVE BROOD SOWS GOOD CARE

Proper Exercise and Protein Feeds in Winter Will Aid in Production of Strong Litters.

(Prepared by the United States Department of Agriculture.)

If the sows that are to farrow in March and April produce good strong, vigorous litters and get their pigs through successfully to weaning time they must be properly cared for from now until the day of farrowing. One of the biggest hindrances to the sows' farrowing good strong, vigorous litters is lack of exercise. During the cold and snowy weather hogs like to lie around the sleeping quarters and be comfortable. That, however, is just what they should not do all the time, advise the specialists of the United States department of agriculture.

The proper exercise for a broad sow is that which she will take voluntarily and not through force. They should get their corn ration by hustling for it in the stalk fields and not by getting it fed around the sleeping quarters or feeding floors or in troughs. Feed them ear corn during the winter months and scatter it out in the stalk fields. The manure spreader is a good implement to use in scattering this corn. Don't be afraid it will be wasted, for it won't. You can readily regulate the amount

Pigs at Self-Feeders.

fed so that it will be picked up clean, and you will find next spring that there is not a bit of the corn lying around to go to waste.

Protein feeds in the form of shorts, tankage, oilmeal or alfalfa hay should be supplied. Self-feeders can be used for these feeds, and it is quite successful to grind the alfalfa hay. Sows will eat a larger percentage of alfalfa hay fed in the ground form than when fed in racks unground. This alfalfa is generally cheaper on the corn belt farms than any of the other protein feeds and is a good balance to the corn ration.

By following a few of these simple methods the sows will be brought to farrowing time capable of producing good strong pigs. Every hog grower knows that if he is going to have pigs that do their best from the start they must necessarily be strong and vigorous at farrowing time. The proper care of the brood sow is not difficult and should be carefully looked after by every hog grower.

SHEEP ARE MOST PROFITABLE

Produced More Economically on Farm Than Any Other Live Stock—Pick Up Much of Living.

Sheep, in proportion to the value of their products, are produced more economically on the farm than any other live stock; the feed and labor requirements are less. They fit in with general farming, get much of their subsistence from forage from grazing weeds and grass that would not support other stock. They eat little feed that has a value as human food, and need less grain than other animals. They add materially to the farm revenue but add very little, relatively, to the farm expense.

BRAN AND CLOVER FOR SHEEP

Nothing Better for Ewes with Lambs During Winter Season—Supply Best of Hay.

Feed straw, fodder and stubble grass during the winter, but toward spring ewes with lamb should have the best of first-crop clover hay, say, one feed per day. Nothing is better for them than bran and clover hay.

BEST FEED FOR YOUNG PIGS

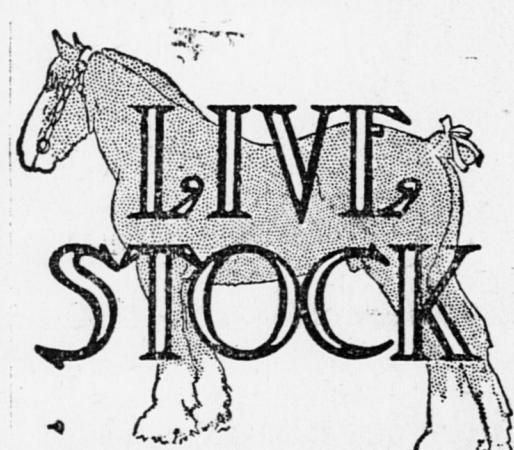

Skim Milk and Middlings Are Excellent Just After Weaning—Feed Four Times a Day.

Skim milk and middlings make about the best feed for young pigs after weaning. When first weaned they should be fed four times a day, giving only a small quantity each time. When well started, three feeds a day are enough.

OUTDOOR EXERCISE FOR PIGS

Animals Should Be Protected From Cold Winds or Hot Sun—Limit Range for Sows.

Outdoor exercise is beneficial, but pigs should be protected from cold winds or from very hot sun. If the sow is turned out with her pigs, do not give her a very large range at first, as she is likely to travel too far and unduly tire the young.

KEEP YOUNG HORSE GROWING

Good Practice, When Not Carried to Extremes, to Allow Colts to Rough It in Winter.

(Prepared by the United States Department of Agriculture.)

Colts that are kept growing make the best horses. Some farmers allow their young horses to "rough it" through the winter and, although this is a good practice when not carried to extremes, if the feeder is not careful it may give the colt a setback which permanently retards its development.

Feeds that will promote growth should be supplied. Good, clean clover hay is palatable and slightly laxative. Timothy hay commonly fed. Well-cured alfalfa hay free from dust is one of the best roughages for growing, but because of its relatively high protein content it generally is economical to supplement it with other roughage such as timothy, mixed hay, or corn fodder. Besides lending variety to the ration such a method of feeding alfalfa would offset any likelihood of kidney or bowel irregularities. Sheaf oats can be used to good advantage to supplement other roughage. The animals should not be allowed to gorge themselves on dry feed. They should be given only what they will clean up readily, but at the same time enough feed should be supplied. Oats, corn and peas, preferably fed ground, are suitable grains. Bran, oil meal or gluten feed will add protein and lend variety. Cottonseed meal should not be fed to foals. Appropriate grain rations for the first winter are: Two parts corn, five parts oats, three parts bran and one part oil meal; or four parts oats, one part corn and one part bran.

Silage should not be fed to foals to any considerable extent. Sliced roots, such as carrots and sugar beets, are very palatable and have a cooling effect on the digestive system. The quantity of feed generally should be regulated by the appetite, although occasionally the appetite may be too ravenous to be a good indication. The general condition of the colt and the droppings should be observed daily. Usually not over one pound of grain per 100 pounds of live weight should be fed until the animal is two years old. A liberal supply of salt and good water and plenty of fresh air and exercise are essential for the proper development of young horses. Illness succeeding exercise will cause constipation. It is often said that a horse is made during his first winter. Certainly this is a critical time in the animal's life, and at no other age will proper feed and attention do as much to make him a good horse. If stunted during the first winter he never will gain proper size and shape.

During the second winter the feed and management should be nearly the same as for the first winter, except that the quantity of feed should be increased somewhat, the colt tied up in his stall and handled frequently. Education by gentle and careful but firm handling at this age will save later much strenuous labor.

BOAR IN PROPER CONDITION

Good Judgment Is Necessary and Extremes Are to Be Avoided—Vigor Is Essential.

It requires good judgment to keep a boar in the best possible condition. Extremes are to be avoided. The over-fat boar is not satisfactory, and a half-starved one cannot transmit vigor and constitution to its young.

SALT FOR SHEEP IN WINTER

When Feeding for Lamb Crop It Is Well to Remember That You Are Feeding for Wool.

Sheep need a little salt winter as well as in summer. When you are feeding for the lamb crop you are also feeding for wool. A well-fed, well-nourished ewe will shear a heavy fleece.

SOW'S FEED OF IMPORTANCE

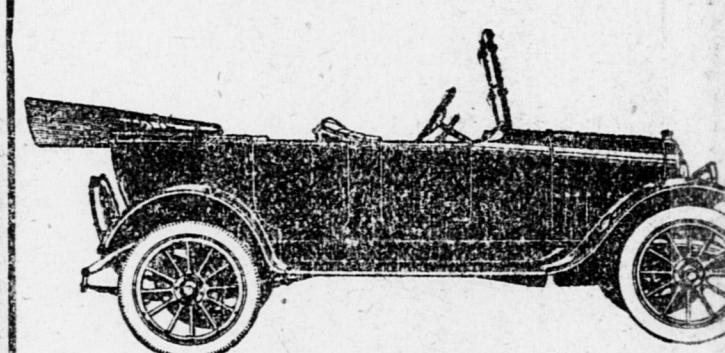

Animal Requires Something Besides Meal—Give Her Roots, Alfalfa or Red Clover Hay.

In the case of the boar, the sow requires something besides meal, and the furnishing of some such feeds as roots, alfalfa or red clover hay, is even more important than in feeding the boar. Skim milk is also excellent when it can be had.

GREEN-FORD AUTO CO.
Agents Greenville, Ky.

You know, of course, that the Maxwell Motor Car is the long distance champion of the world.

You have read that a "stock" Maxwell 5-passenger car ran for 44 days and nights without stopping the motor.

And that, in the 44 days non-stop test, the Maxwell covered 22,022 miles, at an average speed of 25 miles per hour.

But have you, up to now, realized the full significance of that performance?

Do you know that no other motor car in the world has ever equalled or even approached that performance?

In a word, did you take this test seriously when you heard of it? Or did you set it down as a "selling stunt" to give the publicity man something to talk about?

It's worth your while to read and to study the conditions under which that test was made.

You know that the American Automobile Association (familiarly known as the "A.A.A.") is the official arbiter of every automobile test and contest.

But perhaps you didn't know that when a maker places his product under A.A.A. supervision he must do absolutely as told and abide by the decisions of the Board. That's why there are so few A.A.A. Official Records!

This 22,000-mile Maxwell non-stop test was official from start to finish.

Therein lies its value to you.

It proves absolutely the quality of the car—of the very Maxwell you buy.

For verify this was a "stock" Maxwell. Listen:—

First: the inspectors disassembled the motor to see that no special pistons, valves, bearing-metal or other parts had been used.

Every other unit was as critically inspected. Then the car was re-assembled under their own supervision.

As we had much at stake and the test was made in winter (November 23 to January 5) we asked permission to take certain little precautions against accidental stoppage.

Sounds reasonable, doesn't it?

But they refused permission to do any such thing.

For example:—They would not permit a rubber cover over the magneto—it wasn't "stock."

They refused to let us tape the ignition wire terminals—they are not taped on the Maxwells we sell—so of course it wasn't "stock."

Neither would they let us use a spiral coiled pipe in place of the usual straight one from tank to carburetor to guard against a breakage from the constant, unremitting vibration—it isn't "stock."

Nor to use a special high priced foreign make of spark plug—the run was made

For Congress.

We are authorized to announce that M. A. HENRY, DEPUTY REPT. OF WORCESTER COUNTY, candidate for Congress from the Third Con. ressional district, to represent the action of the Democratic primary to be held in August, 1918.

We Americans have not yet been accorded full honors by Germany, which has not, thus far, blamed us for starting the war.

GREAT BRITAIN helped us celebrate the Fourth in 1918—a far cry from 1776. When will Germany begin to celebrate our Fourth.

Not even adorable women can make overall look pretty by wearing them, but she can invest them with a certain attractiveness.

In one respect one feels sorry for our boys "over there"—no watermelons in the world equal ours and they are not easy to transport.

Our boys were called upon to be heroes and they were. Now they are called upon to be conquerors and they will deliver the goods.

ABOUT the greatest blessing that can be asked by those who have failed to help in this war for democracy is a short life after the war is won.

HERE is another where that may have been remarked before, but we find it credited to the Fulton Mo. Sun, which originates many good things. When a birth is reported the proper query is, "Soldier or nurse?"

Large stock of mirrors at Roark's small prices.

Pointed Paragraphs.

The less a man knows the more suspicious he is.

Any man can make his wife do anything she wants to.

When your friends are not tramps it is up to you to discard them.

With the dealer in second hand goods it is never too late to mend.

No amount of voice culture will make a fat man stop snoring in his sleep.

An amateur may be a person who has entered the first stage of ignorance.

Wings of riches enable them to fly up and roost on the highest branches.

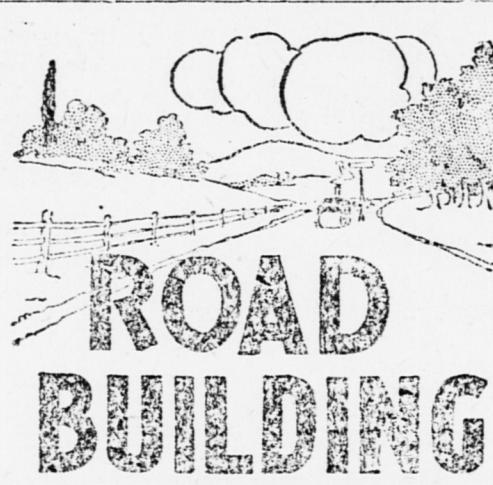

Some men are so busy looking for a position that they have no time to work.

Few women make successful lawyers. They are unable to break themselves of the habit of giving free advice.

The average girl is a queer creature. She'll make fun of a young man one day and marry him the next.

GARDEN

Give more time and attention to the garden. And produce a better quality of vegetables. Rely on good seeds, good soil and good care. Devote some time each day to care of the garden. Every farmer's table should be supplied from his own home garden. Now is the time to plan your garden.

BENEFITS OF CONCRETE ROAD

Makes Travel Quick, Safe and Easy, Clean and Comfortable—Saves More Than It Costs.

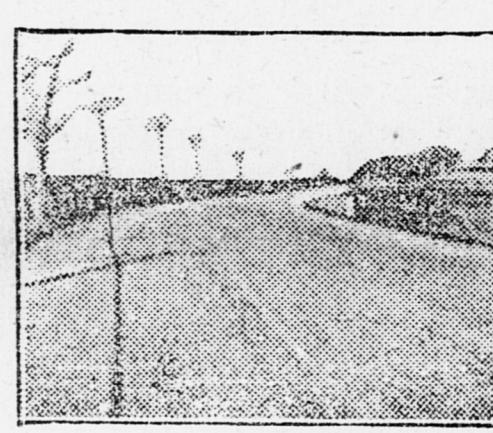

Concrete roads are country boulevards. They benefit a community in making travel quick, safe, easy, clean and comfortable. They extend neighborhood limits, bring more people into personal touch with each other, increase social opportunities and thereby remove the monotony of isolation; being greater content to the youth on the farm, make city and country near neighbors and increase school attendance, thus cultivating a desire for a broader knowledge and higher standards of living.

Concrete roads make daily rural mail delivery a fact, every home unit in the community is put on the news wire with the political, financial, industrial and trading centers of the earth. The best thought of the world in every line of human effort and human achievement is transmitted overnight through the breakfast table of the community served by a network of concrete roads. A concrete road saves more than it costs. It is open to maximum traffic all the year round. It brings greater freedom and ease of movement in travel and transportation and permanently increases land values.

M'ADAM WAS ROAD REPAIRER

He Originated Method of Covering Surface of Ground With Impermeable Crust or Covering.

Just 200 years ago was born "the first of the pioneers who took up the work of scientific road building." John Metcalf showed how to carry solid highways across difficult bogs, and Thomas Telford built his roads, topped with gravel, on a solid foundation of stone blocks. But the great reform of the art came in with John Loudon McAdam, who traveled 30,000 miles over the English and Scottish roads to study the conditions and needs for himself. Bestowing a new word on the language, he originated the method of cov-

ering the surface of the ground with an impermeable crust, cover or coating, so that water would not penetrate to the soil beneath. A road thus "macadamized" was found to yield less easily to weights pressing upon it, and could not be broken up by the action of frost. But while the inventor's fame spread, his resources dwindled, and though made surveyor general of roads, had to depend for his recompense on a parliamentary grant. McAdam was a road repairer rather than a road builder, but his system went all over the world.

SPRING CARE OF HIGHWAYS

Go Over Road With Grader to Clean Out Ditches—Fill All Ruts With New Material.

Every spring before the ground becomes too hard the road should be thoroughly gone over with a grader to clean out the ditches, so that the water may have a free outlet. The ruts and holes should be filled, elevations in the road and shoulders on the side of the road planed off, the grade improved, and the road put in good condition.

Earth roads have a pronounced tendency to rut. When ruts begin to appear on the surface great care should be used in selecting new material, with which they should be filled immediately. One fundamental principle that is of special importance in the repair of any road is that whatever material is used in the construction of the surface, the same material—and no other—should be used in its repair.

A good road with a surface of clay should be repaired by using clay, a gravel road with gravel and a surface of limestone with limestone.

Hog Needs Protection.

The hog is rather scantly provided with hair and the warmer the country the less hair. Therefore, he needs protection during the storms of winter. Unless you provide it, you invite colds, influenza, lung troubles, rheumatism,

sowing slow seeds, etc.

In sowing seeds that start slowly, as parsnips, etc., etc., it is well to sow with them a few strong, quiet, germinating seeds to break the crust and mark the rows so that cultivation may begin early.

Roark is in better position to give you Victrola and record service than many dealers in cities of 10,000 inhabitants. Orders are placed many months ahead, and work is larger here than can be found elsewhere, in Victor goods, which have always been hard to get, on account of the world wide demand, and more difficult to get now than ever before.

Of What Use Is The Rat?

One of the zoological details connected with the rat is its failure to sustain any discoverable relation with the balance of nature. The balance of nature seems remarkably even all over the world, for no kind of life can become wholly extinct without affecting judicially the general environment.

The rat seems the solitary exception to the general experience that interference with the funds of an environment invites disaster through an upset in the balance of nature. Other forms of life, vegetable or animal, upset it by their absence. It was thought until recently that a peculiar species of flea could thrive upon the rat alone, but some doubt is thrown upon this idea by reports of plague investigators.

There is, however, another view of the connection of the rat with the balance of nature, according to the Paris Revenue Scientifique. The rodent has achieved its task, performed its duty. The work was accomplished in past centuries, probably in Asia. Rats will attack very large organisms. Even the elephant is not respected. It is widely known that certain varieties of Asiatic elephants have a dread of rats. Cases are recorded in which a huge elephant has succumbed to wounds made in its feet by rats. The rat gnaws the hoofs of horses when it can get at them. It would exterminate the pig if it could find a neutral in man.

In brief, all the evidence suggests that there has raged in the past a great warfare between the rat and certain gigantic forms of animal life. The brown rat seems to have had much to do with the extinction of certain great beasts in Asia. Perhaps the mastodon was routed by this rat. In any event, the rat may have played a glorious part in eliminating the bulky monsters that in time past have kept man down numerically just as today the robin plays a glorious part in eliminating from the soil the pests that otherwise would keep the crops down.

The very voracity of the rat must have been of great zoological importance when it had to attack perhaps, a herd of mastodons. The rats traveled then, evidently in swarms. Nothing could stand them or withstand them. Having eaten up everything that could not run or fly back, the rat turned to Europe and had to satisfy itself with new habits and different food. Its connection with the balance of nature was destroyed and it is today a meaningless survival with nothing but a somewhat doubtful claim to a characteristic flea.

The largest stock of talking machine records to be found in this part of Kentucky can be found at Roark's.

Weather For Week.

Oho Valley and Tennessee: No precipitation of consequence indicated. Temperature nearly normal.

We're here to help you get the best results and the most satisfaction from your talking machine, no matter what make, and our eight years' experience is freely at your command, and should be of benefit to you. —The J. L. Roark Estate.

Sharp Practices Cannot Endure.

For eight years we have been distributing Victrolas in Muhlenberg, and our faith in them is much stronger now than when we secured the agency, for the decision reached then, after an exhaustive study of all machines on the market, led us to the Victrola, and its performance has given most complete satisfaction to every purchaser, so much so that from first to last machines sold by us are in the hands of original purchasers. The field is enlarging rapidly, and in time practically every home will have some sort of machine. It is to our interest, and to the mutual interest of every buyer, that most thorough investigation be made in the selection of this item. We have at all times a representative stock of instruments and records, and gladly give public demonstrations. Records of all machines will be played, and the most thorough investigation and comparison of both machines and records should be made by you, and are invited by us. No sharp practices have ever been used by us in making a sales call. We will not resort to trickery, "double-dealing," or records in the making of demonstrations, and other headwinking acts and statements followed by some dealers. Everybody gets a square deal from us, before and after a sale, and we refer to our large family of Victrolas users, our best incentive and greatest asset in the continual enlargement of this branch of our establishment.

THE J. L. ROARK ESTATE,
C. L. Roark, Manager.

Get satisfaction—buy a Victrola for it constantly delivers the best in instrumental and vocal music of the world, without expense and worry.

Uplifting Talk.

Though thrones may crash and kingdoms tremble, some delegates, when they assemble, can only talk disease, their gossip flows in endless rivers concerning hasty lights and livers, and mumps and housemaids' knees. Last night some neighbors came to cackle; the only subjects they would tackle were symptoms and the like; one talked for hours about lambagoes and distemper, another about sago, his stomach on a strike. I wished to talk about the fighters we've sent to can the Prussian bladders and put them in the soup; alas, my stern patriotic neighbors had little use for such words as sabers, while they'd only talk of croup. With chargers neighing, captains yelling, the small boys talk are always dwelling upon their piffling ills; in presence of great world disasters we hear men talk of porous plasters and antihilious pills. Upon the market place I loiter, to talk of gore, and not of goiter, of war, and not of warts, I'm tired of men who're always thinking about the medicine they're drinking by gallons, pints and quarts. —WALT MASON.

Get your order placed with Roark for a Victrola, as for months there has been a waiting list, on account of the world-wide strong demand for this instrument. While large stocks of machines are always on hand, it has been many a moon since all type instruments have been here at one time.

Young Man Dies Sunday.

Chester McCown, a well known young man, died at his home near Dovey the Fourth of July, after an illness of a week from pneumonia. He was an industrious boy, and loved by all who knew him. The body was carried to the home of his father, Mr. Robert McCown, near Leopold, and was buried in the family lot on the farm Friday morning. He is survived by his wife and one child.

Study Will Save Sorrow.

More than in any other item, prospective buyers should make a close study of the talking machine field, for very few people know much about such things, and it is too important to jump into the game. In presenting the Victrola, Roark publicly and privately urges people to see and hear all machines, as no other course is safe. Comparisons are educational, and the buyer should only avail himself of every opportunity for investigation, not only of the machines but by interviewing owners of machines, and getting the complete record of service delivered. The purchase price is the first payment on some instruments, as repair bills are frequent and expensive.

Her Happiness and Theirs

Is assured on this outing for they brought along their Portable Victrola, and in play, at rest or when friends gather at the camp, all the good things in the Victor record library can be presented.

See and Hear This \$22.50 Victrola

It has all the exclusive, patent-protected features of the larger members of the Victrola family, and is worthy of a place in any home. Get yours now, and be ready for summer joys at home or wherever you go.

Now Eating Instead Of Drinking.

Quite a crowd of people gathered around the up-town office of the ice company last Sunday morning, getting a supply of ice for the day, and as they waited their turn, of course there was lively conversation, instead of conservation. One colored man was getting a large chunk of coldness, and one of his white friends asked him if he had enough beer to require so much ice. The colored man replied: "Well, I don't know what you white folks are doing with your ice, but us colored folks are eating ice cream and sherbet, instead of drinking whisky and beer." It was one of the best temperance lectures made in a long while, for it was the truth, and applies not only to the colored folks, but to everyone, who had done that way.

Some special wallpaper bargains at Roark's.

Miss Ruth Bohannon returned to her home the first of the week from Central City, where she had been on a visit to her sister, Mrs. Pulley.

There are over 300 talking machines on the market, but the Victrola is first—in thought, sales, service, satisfaction. See and hear why at Roark's.

Farmers have paid more attention to the cultivation of their crops this year than ever before, and notwithstanding the scarcity of labor, have things in fine shape.

Join the large and happy family of Victrola owners. Best of the kind, beyond doubt, and nothing can give the same lasting satisfaction to the whole family, and the cost is slight.

The next contingent of troops to be sent to Camp Taylor from this county will consist of thirty colored men, who will leave on the 17th.

Right now, all over this country, the person who does not work, no matter his age, if he is able to perform labor, is held in the same deep contempt as the slacker who will not fight.

Mr. C. A. Tevebaugh, associate secretary of the Kentucky Y. M. C. A. War Council, was here yesterday conferring with our people on matters of importance in this branch of the service.

Some people always get the best, others get what's left, and others get left. Select your Victrola now, at Roark's, and have delivery whenever you wish.

This was the safest and sanest fourth this country has ever enjoyed. Not a person was injured in Muhlenberg, and there were very few throughout the whole country.

The Victrola, at home and abroad outsells any instrument, many times over, and comparisons will plainly show you why. Roark will gladly demonstrate.

A two-months' old son of Mr. and Mrs. Buck Mitchell died at their home at Brownsburg last Sunday, from an attack of dysentery.

Most for your money in a Victrola. Cut prices show a weakness in the goods and any machine except a Victrola can be bought by anyone at a reduced price.

Weeds should get special attention at once, before the seeding is completed. If all weeds were kept down for just one season, it would be easy thereafter to grow grass.

Merchants of Greenville are wide-awake and seeking increased business. Trade with them in confident assurance of best goods at lowest prices.

A very large number of our people enjoyed the excellent programs of the Redpath Chautauqua at Central City, the five day session closing Monday night. It was also a financial success, and there is a good sum on hand for next year.

The tones on a Victrola spring and mingle as on no other instrument. The light weight on the needle does away with the gritty, grubby, scratchy noise so manifest on all other machines, and insures the supreme delights of music, song and story. See and hear at Roark's.

Many new records can now be found at Roark's, in Victor skip-
pings. Trade with Roark, who teaches your dollars to have more cents.

Mr. Otto A. Rothert has written that he expects soon to come down from Louisville for a visit of a few days with his Muhlenberg friends.

Muhlenberg Soldier Returns From France.

Lt. Will P. Longest, who has been in France for the past several months, has been here for a few days, with home folks and friends. He is en route to Camp Kearney, near Los Angeles, where he has been assigned as instructor. He has seen active service on the French front, but escaped injury. He reports conditions as very much improved, since our entrance in the war, and American soldiers are shown every courtesy and given all possible honors for the valorous share he is taking in the war.

Victrola owners are the most exacting and at the same time the most pleased body of people in the country, the same as they are the world over. Join them, and you will know why. See and hear these instruments at Roark's before buying any machine.

Volunteer Call For Skilled Men.

The Engineer Corps is in need of certain skilled men. Only white men qualified for general military service may be accepted under this call, and no one who is needed to fill the July calls already announced should be allowed to volunteer for this service.

Volunteers may be accepted from the 1618 class provided the registrants waive all time limits for classification and examination.

The following types of men are desired:

Auto Repairmen, Axemen, Blacksmiths, Boatmen, Bridge Carpenters, Cabinet Makers, Caulkers, Concrete Foremen, Concrete Workers, Construction Foremen, Cooks, Draftsmen, Electricians, Gas Engineers, Stationary Engineers, Farners, Horse Shoers, Lithographers, Machinists, Bulgers, Photographers, Plumbers, Powdermen, Quarryman, Riggers, Saddlers, Shoemakers, Surveyors, Tailors, Teamsters, Telephone Operators, Timbersmen and Topographers.

Volunteers for this call shall not be released to the Navy or Marine Corps nor shall they be permitted to withdraw their applications prior to August 1st.

Local Board for Muhlenberg County, Ky. Greenville, Ky.

Worm gears, with ball bearing points, the Victrola motor surpasses the bevel-gear motors in other machines to same degree it does in every other feature.

Miss Viola Radford and Lt. Harry Bass, of Hopkinsville, were married in Nashville last Friday, and will make their home at Augusta, Ga. The bride is very popular here, where she frequently visited, and the groom is a well known business man, now in the service of his country, and held in high regard by his fellow officers and men.

Silent, swift, simple, strong, the White is the greatest sewing machine on the market. Full line on the floor at Roark's, and you are asked to see them.

If a poor half-witted I. W. W. can be sent to jail, if a Mrs. Stokes can be shut up for fifteen years, what punishment is fit for the war profiteer who robs us of our last penny when we are in such a position that we cannot resist?"—Prof. S. H. Clark, at Chautauqua, N. Y., Assembly.

Many new Victor records received by Roark this week.

Rev. C. E. McLean, who has volunteered in the Y. M. C. A. overseas service, and will report at New York on the fifth of next month, will leave this week with his family for his South Carolina home, where they will reside while he is abroad. Rev. McLean has made a wide circle of admirers here, and not only the members of the Presbyterian church, but all our people bid him God speed in his patriotic service.

The Victor tung-stone supplies your need in needles. See Roark.

Beloved Woman Dies.

Mrs. Landsey Spurlin, aged 40, died at her home near Depoy July 4. She is survived by her husband and nine children, one a newborn baby. Funeral services were conducted by Rev. J. C. Gary at Pisgah church Friday afternoon, and interment was in historic Old Liberty graveyard. Deceased was a very lovable woman, and the community is in deepest sorrow.

Use a Cleanrite brush on your Victrola, getting better results and protecting your records.

The war against vagrancy is getting to be general, and after being hauled up, several persons here have gone to work. Most of the slackers did not wait for a trial, but it took special efforts to get a few of them at it.

Mr. Ralph Bingham appeared last Friday night on the Redpath Chautauqua program at Central City, and was greeted by the largest audience of the season, who enjoyed his talents to the utmost. He gave one of his Victor record selections, "Mrs. Rastus Johnson at the Wedding," and was roundly applauded.

Who knows more about music than the world's greatest artists? They have chosen the Victrola for the exclusive presentation of their rare art and talents, and their rare art and talents, and their vital opinion is the safest guide for every purchaser of a talking machine. Let Roark demonstrate the supreme Victrola and records.

Snaps in high grade wallpaper at Roark's.

Three More Cows Die.

Three more Jersey cows died last week, the losers being L. Z. Kirkpatrick, S. D. Bradley and Lennie Fouls. These cows all ran on the pasture of Mr. Kirkpatrick, and it has not been discovered what caused the fatalities.

You are practicing economy when you buy a Victrola from Roark, for the upkeep is nothing. Ask any of the 350 Muhlenberg owners; also ask owners of other machines what they are paying for springs and other repairs, and how much time their machines are out of service for various reasons.

Victrola Dominance Grows.

Victrola dominance is greater today than ever before. The latest in the field of standard machines, it quickly emerged from the rest. It has added many vital and exclusive features of construction, and has overtaken everything except demand and while the Victor Co. is annually expending millions in buildings, machinery and equipment, the world calls for more in greater degree each year. Roark places orders many months ahead, and that is why you can place an order now and get what you wish from him.

The Victor tung-stone supplies your need in needles. See Roark.

STOP when in Chicago at the Board of Trade Hotel

You can get any other machine you want, at any time, but you will keep the Victrola forever, when you get it. Better wait for the one you want, and which so many people all over the world want, that deliveries are behind the demand. Roark expects liberal shipments soon, or orders placed many months ago.

Trade with Roark, who teaches your dollars to have more cents.

Anybody can cut prices, but no salesman can put qualities in goods not airily there. That is why Victrolas, alone, of the whole talking machine family, sell at the full price, the world around.

CITY ORDINANCE.

The City Council of the City of Greenville, do ordain as follows:

Sec. 1. It shall be unlawful for any person residing in the city of Greenville, to keep or harbor any dog in the city limits of said city without first having procured from the clerk of said city license for each dog so kept or harbored, by paying to said clerk for each of said dogs the sum of Two Dollars and Fifty Cents (\$2.50) per annum and receiving from said clerk a metal tag, bearing a serial number and the year it is issued, to be placed on the collar of each of said dogs, and worn continually by said dog; any dog found in said city without such tag shall be impounded by the marshal, as herein provided; and person so owning, keeping or harboring a dog in the city limits and failing to procure such license shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined the sum of \$5.00 and the costs of the prosecution.

Mr. Ralph Bingham appeared last Friday night on the Redpath Chautauqua program at Central City, and was greeted by the largest audience of the season, who enjoyed his talents to the utmost. He gave one of his Victor record selections, "Mrs. Rastus Johnson at the Wedding," and was roundly applauded.

It shall be the duty of the marshal of the city of Greenville to take up and impound all dogs found unaccompanied by an owner or keeper, in said city limits and not having a license tag upon its collar, and after posting notice in three conspicuous places in said city giving a description of said dog, notifying the owner thereof, and owner to appear and pay the impounding fee, which is hereby fixed at one dollar and twenty-five cents for each day said dog remains in said pound; within five days from the date of said notices, if said owner, keeper or harbinger fails to appear, then said marshal shall report in writing to the police judge of said city the facts, giving the name of the owner if known and a description of the dog so impounded, said statement to be sworn to by said marshal; whereupon the Police Judge shall issue summons against the owner if known, to appear for trial, within three days, and if the owner is unknown then said judge shall post notices at the City Hall and the Court House door notifying said unknown to appear within five days and show cause why said dog should not be sold or killed; and upon trial of said case said judge upon finding said ordinance has been violated may order said dog sold for the amount of license, fine and costs, including impounding fees, and if no bidder appears, then that the marshal kill said dog. All ordinances in conflict herewith are hereby repealed.

Introduced May 6, 1918.

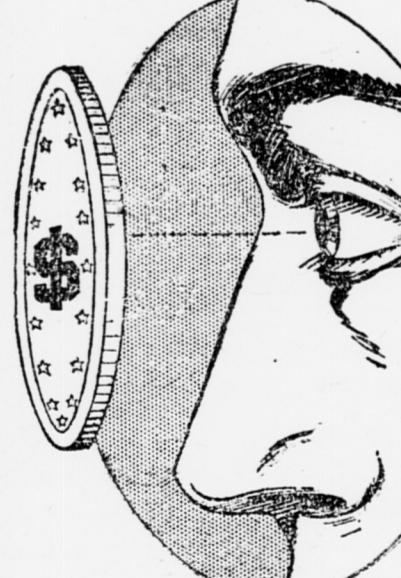

Adopted July 8, 1918.

C. W. Roark, Mayor.

Orien L. Roark, Clerk.

Several one room patterns of wallpaper at Roark's are offered at cut prices.

Guaranteed to put you in the pink condition. This and more than one hundred other Red Cross Remedies and Toilet Preparations sold and guaranteed only by

R. F. Jarvis, Greenville, Ky.

The greatest musical center in the whole world

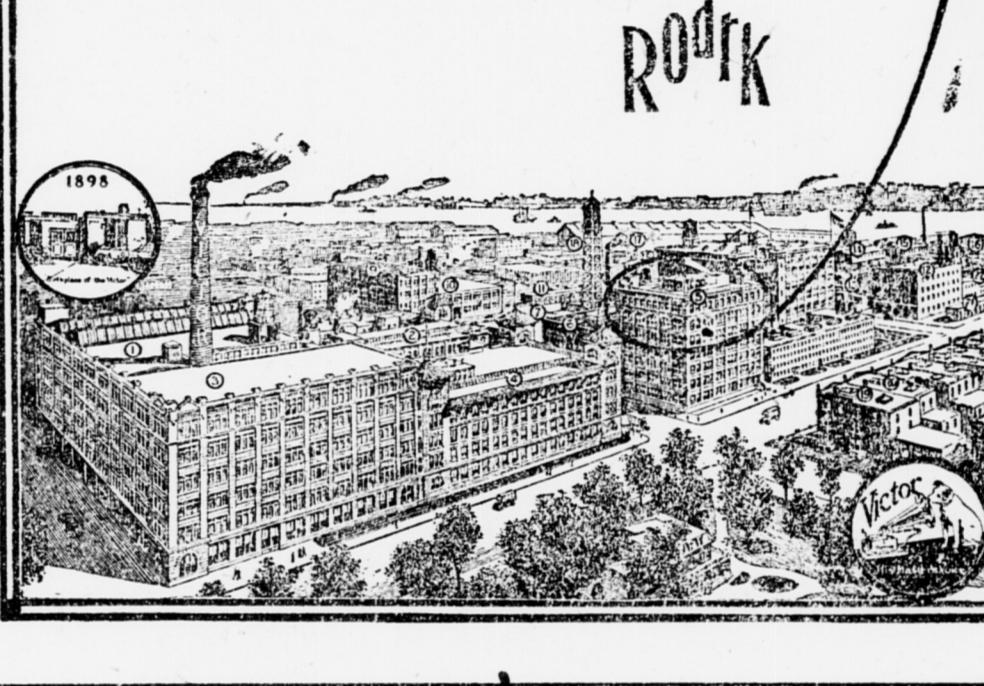

Greater than the Metropolitan Opera House; greater than Covent Garden, where the royalty of England is entertained; greater than La Scala at Milan, the Grand Opera House of Paris, and the Royal Opera of Berlin; greater in fact than all the opera houses and places of entertainment in the world is the recording floor of Building No. 5.

To this great musical centre comes a never-ending procession of the most famous artists in the whole world. Today it may be Caruso or Amato, and tomorrow it may be Melba, Tetrazzini, Sembrich, Farrar, Gadski, Schumann-Heink, or Homer; or it may be several of them assembling to unite in making a masterpiece like the "Sextette from Lucia." Or it may be Paderewski, or Kubelik, or Elman, or Harry Lauder, or Blanche Ring; and then again it might be Sousa and his band, or Victor Herbert and his orchestra.

But whoever it is or whatever the organization, rest assured they are all waiting to enter your home which will become just as great a musical centre when you have a Victor or Victor-Victrola.

You can hear some of this exquisite music today. Come in and we'll gladly play your favorite selections.

Victors \$10 to \$100. Victor-Victrolas \$15 to \$200. Terms to suit your convenience.

The Kitchen Cabinet

There's a voice in the breeze, there's a song in the sun,
That whispers of winter's farewell.
There's a mist over the land, there's a
dew on the grass, there's a
There's the echo-music of a bell.

VARIOUS SAUCES.

An appropriate sauce is a most valuable accompaniment to any meal or croquette, adding just the touch of seasoning which the dish needs to make it tasty.

Hors d'oeuvres

Sauce.—This is good with fish and various meats. Take four tablespoonsfuls of fresh horseradish which has been grated and standing in vinegar. Add salt, a dash of cayenne and four tablespoonfuls of whipped cream.

Sauces for Croquettes or Cœufs.—Melt a tablespoonful of butter, add a half cupful of stock and the same amount of milk, mix this with the flour, stir until well coated, add a beaten egg yolk, a half teaspoonful of salt and a dash of pepper, strain and it will be ready to use. Do not heat after the egg is added.

Hollandaise Sauce.—Melt a tablespoonful of butter, a pint of the liquor in which fish was boiled, the yolks of two eggs and lastly the juice of a lemon, a teaspoonful of onion juice. Just before serving add a tablespoonful of chopped parsley.

View Sauces.—This is especially good with corned beef. Chop fine two tablespoonfuls of parsley and rub it to a paste on a plate with a sprig, adding a few drops of vinegar until it is like paste, then add three pickled olives, chopped fine, three gerkins chopped fine, four olives, also chopped, and add to a sauce made from a pint of good stock thickened with the usual tablespoonful of butter and flour. Add a tablespoonful of vinegar, a tablespoonful of mushroom ketchup and let it simmer ten minutes. Strain if desired and pour into the sauce boat.

Imitation Worcestershire Sauce.—Soak a cat's liver in brine strong enough to hold up an egg. Let the liver stand in the brine four days. Take it out dry, rub with salt and let stand in a cool place a week. Then put the liver through the meat chopper many times until very fine, mash six cloves of garlic, grate one large onion, add a quarter of a teaspoonful of mace, five anchovies, twelve whole cloves and a quart of vinegar. Let stand over night, add cayenne, strain and bottle.

Nellie Maxwell The Kitchen Cabinet

One of our students of diet tells us that one-third of the food taken into the body is used, the other two-thirds we eat at our peril.

MEATS TO EAT.

We have meats to eat and meats to ship these days. The meats to eat, must be confined to those which will not spoil and we need fear no hardship, for they offer a goodly variety.

Sweetbreads, for instance, are perishable as well as liver, kidneys, fish and fowl.

Fried Sweetbreads.—Parboil and remove all the inedible portions, and when cold, split in halves and cut in pieces the size of a large oyster, wipe dry and dip in beaten egg, then in cracker crumbs and fry in hot fat. Season well and serve with parsley as a garnish.

Larded Sweetbreads.—Trim two sweetbreads, parboil in water with a tablespoonful of vinegar added, then chill in cold water. Dry them and lard with fine strips of bacon. Put a slice of bacon in a sauceman, a chopped onion, a chopped carrot, spice and herbs, with salt, and a small quantity of stock. Cook down until the stock has all evaporated, then brown the sweetbreads and serve.

Baked Sweetbreads With Peas.—Trim five pairs of sweetbreads and parboil 15 minutes, lard them, dredge with seasoned flour, add stock or water to cover the bottom of the baking pan, and bake 40 minutes, basting often. When nearly done add a tablespoonful of flour to a tablespoonful of bubbling-hot butter and mix well; add a cupful of highly seasoned stock or milk with seasonings, then a cupful of green peas drained from their liquor.

Sweetbread Salad.—Cooked sweetbreads finely minced and combined with peas, celery, a few chopped pickles and olives with a handful of nuts and a good salad dressing make a most tasty and popular salad.

Sweetbreads cooked and served in a rich seasoned white sauce, served in timbale or pastry shells make a sumptuous dish suitable when entertaining. In many markets sweetbreads are reasonable in price, but when too costly the delicate meat will have to be deviated to those with fat pocketbooks.

Sweetbreads are rather tasteless, so need a highly seasoned sauce and a touch of garlic or onion.

POULTRY FACTS

IDEAL HOUSE FOR CHICKENS

Wherever Possible Building Should Have Southern Front—Fresh Air and Sunshine Help.

Plenty of fresh air and sunshine, along with freedom from drafts and dampness, are the requisites of ideal poultry house, yet there are many poultrymen who build expen-

Melt a tablespoonful of butter, add a half cupful of stock and the same amount of milk, mix this with the flour, stir until well coated, add a beaten egg yolk, a half teaspoonful of salt and a dash of pepper, strain and it will be ready to use. Do not heat after the egg is added.

Hollandaise Sauce.—Melt a tablespoonful of butter, a pint of the liquor in which fish was boiled, the yolks of two eggs and lastly the juice of a lemon, a teaspoonful of onion juice. Just before serving add a tablespoonful of whipped cream.

House With Open Front.

sive houses for their fowls without giving a thought to the real needs of the hen. Nothing plays a more important part in regulating the condition of the house than does location. Wherever possible the house should be built on a southern slope and it is better if there is some protection, as a grove of trees, to the north. This will give the house plenty of sunlight during the greatest possible time and will also protect it from the cold winter winds.

GET EGGS AND MEAT FROM KITCHEN WASTE

Prepared by the United States Department of Agriculture.

In every household, no matter how economical the housewife, there is a certain amount of table scraps and kitchen waste which has feeding value, but which, if not fed, finds its way into the garbage pail.

Poultry is the only class of domestic animals which is suitable for converting this waste material, right where it is produced in the city, into wholesome and nutritious food in the form of eggs and poultry meat.

Each hen in her pullet year should produce ten dozen eggs. The average size of the backyard flock should be at least ten hens. Thus each flock would produce in a year 100 dozen eggs which, at the conservative value of 25 cents a dozen, would be worth \$25.

By keeping a backyard poultry flock the family would not only help in reducing the cost of living but would have eggs of a quality and freshness which are often difficult to obtain.

Remember that eggs produced by the backyard flock cost very little, as the fowls are fed largely upon waste materials.

BEST GRASSES FOR PASTURE

When Sowing Make Up Mixture So That Some of Plants Will Be Growing at All Times.

It is possible for pasture to be so scant that the cow uses up all her milk in securing enough nutrients from it to maintain her body. When sowing for pasture make up a mixture of grasses such that some one of the grasses will be green and palatable at all times of the growing season.

EARLY HATCHING IS DESIRED

It will Increase Number and Size of Fowls and to Farmer It Means Much Larger Profits.

Prepared by the United States Department of Agriculture.

To the country at large early hatching by every chickener raises means much. Early hatching will increase the number and size of fowls and the number of eggs produced next year. It will mean bigger birds and birds that will lay in the winter months.

To the individual farmer it means more profit. He will get more chickens, as a larger proportion will live; he will get more actual meat, not only because more will live but because his chickens will be larger; and he will get more eggs, when eggs are scarce, for early hatched poults will lay in the winter, then brown the sweetbreads and serve.

Baked Sweetbreads With Peas.—Trim five pairs of sweetbreads and parboil 15 minutes, lard them, dredge with seasoned flour, add stock or water to cover the bottom of the baking pan, and bake 40 minutes, basting often. When nearly done add a tablespoonful of flour to a tablespoonful of bubbling-hot butter and mix well;

add a cupful of highly seasoned stock or milk with seasonings, then a cupful of green peas drained from their liquor.

Sweetbread Salad.—Cooked sweetbreads finely minced and combined with peas, celery, a few chopped pickles and olives with a handful of nuts and a good salad dressing make a most tasty and popular salad.

Sweetbreads cooked and served in a rich seasoned white sauce, served in timbale or pastry shells make a sumptuous dish suitable when entertaining. In many markets sweetbreads are reasonable in price, but when too costly the delicate meat will have to be deviated to those with fat pocketbooks.

Sweetbreads are rather tasteless, so need a highly seasoned sauce and a touch of garlic or onion.

DAIRY FACTS

ENORMOUS WASTE IN WINTER

Minnesota Dairy Export Makes Startling Statement as to Amount of Milk That is Wasted.

Three and one-half billion pounds of milk are practically wasted in the dairy states every winter. This makes 21,000,000 pounds every day. The foregoing is a startling statement, but R. M. Washburn of the division of dairy husbandry, Minnesota College of Agriculture, says it is true. The farmer feeds most of his skim milk to hogs. This milk, fed to hogs, produces only 20 per cent of its energy value in edible pork. Eighty per cent of its energy value is lost. Mr. Washburn says, though, that some milk is necessary to feed pigs off strongly.

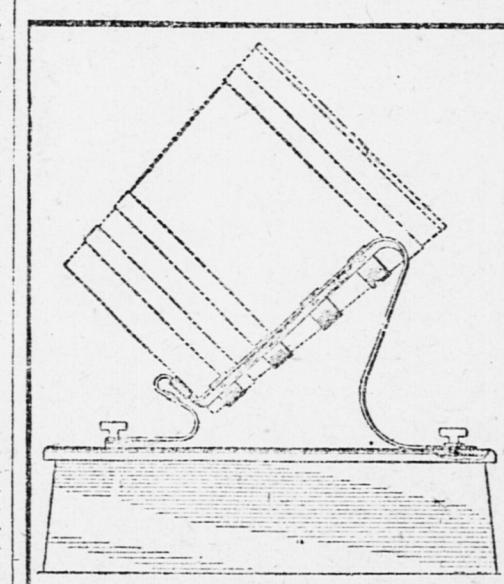

Much more of the energy value of the skim milk will be saved if it is made into cottage cheese. Every 100 pounds of skim milk, says Mr. Washburn, is equivalent to 20 pounds of ordinary meat and will make 15 pounds of cottage cheese. The cheese contains about one-third more protein and one-third less energy than meat, and is therefore essentially equivalent to meat.

DEVICE ON BUTTER SCALES

Resilient Support Absorbs Most of Shock When Tub is Thrown Gently on Platform.

The Scientific American in illustrating and describing an attachment for scales, invented by F. D. Shea, 164 Chambers street New York, says:

This device is adapted particularly for the weighing of butter. It consists of a resilient support secured to the platform of the scales, which will absorb most of the shock when a tub of butter is thrown gently thereon.

Attachment for Scales.

thus relieving the scales of jar and making it possible to ascertain the weight of a tub of butter more quickly.

OPEN SHED IS SATISFACTORY

Experiments Conducted by Department of Agriculture on Government Farm at Beltsville.

Prepared by the United States Department of Agriculture.

In experiments at Beltsville, Md., by the Bureau of Animal Industry, United States Department of Agriculture, a warm barn, commonly deemed essential for large milk production during the winter months, proved to be somewhat less satisfactory than an open shed. Experiments extending over three years showed that cows housed in the open shed consumed a little more feed, required more bedding and slightly increased labor cost, but because more milk was produced and on account of the lower cost of housing, the open shed was found to be somewhat more economical.

If the Victrola did nothing more than help to pass the time, it would still be worth while in the sick room.

But it does more than that—it cheers the invalid and helps toward a more rapid recovery.

The portable sizes of the Victrola are to be had at \$15, \$25, \$40, \$50; the cabinet style from \$75 to \$400. Easy terms can be arranged if desired.

Stop in and we'll gladly demonstrate the Victrola and play any music you wish to hear.

STYLE XVI VICTROLA, \$225

The Aristocrat of the Victor Family

Its very appearance suggests culture and refinement—the kind of instrument you are proud to have in your home—to have your friends see—that brings you prestige and their respect.

To appreciate its individuality and wonderful tone reproducing qualities it must be seen and heard in comparison with all other models. Artistic—made from choicest woods—beautifully finished—it enters the finest homes to delight and entertain. To own one is to know complete satisfaction.

LIVER DIDN'T ACT DIGESTION WAS BAD

Says 65 year Old Kentucky Lady, Who Tells How She Was Relieved After a Few Doses of Black-Draught.

Meadows, Ky.—Mrs. Cynthia Higginbotham, of this town, says: "At my age, which is 65, the liver does not act so well as when young. A few years ago, my stomach was all out of fix. I was constipated, my liver didn't act. My digestion was bad, and it took so little to upset me. My appetite was gone. I was very weak..."

I decided I would give Black-Draught a thorough trial as I knew it was highly recommended for this trouble. I began taking it. I felt better after a few doses. My appetite improved and I became stronger. My bowels acted naturally and the least trouble was soon righted with a few doses of Black-Draught."

Seventy years of successful use has made Thedford's Black-Draught a standard, household remedy. Every member of every family, at times, need the help that Black-Draught can give in cleansing the system and relieving the troubles that come from constipation, indigestion, lazy liver, etc. You cannot keep well unless your stomach, liver and bowels are in good working order. Keep them that way. Try Black-Draught. It acts promptly, gently and in a natural way. If you feel sluggish, take a dose tonight. You will feel fresh tomorrow. Price 25c. a package—One cent a dose.
